

### **Site Transition of Closure Sites:**

The transition of Closure Sites from the Office of Environmental Management (EM) to the Office of Legacy Management (LM), National Nuclear Security Administration (NNSA) or Office of Science (SC) transition plans and agreements can be viewed on the [CIO website](#). Part of this transition is the assumption of responsibility for the records created by the site personnel during operation and environmental restoration.

Site Transition Plans represent EM and either LM, NNSA or SC's joint expectations up to and including the point of programmatic transfer. Each site's plan describes the key transition activities, including schedule, milestones, and required resources.
